Summary

Innovative Software Developer with a robust background in ICT and a specialized skill set in full-stack web and mobile application development. Leveraging a Bachelor of Science in Computer Science from Kabarak University and extensive technical experience, I bring a comprehensive approach to software solution design and implementation.

My expertise spans multiple technologies including React.js for dynamic web applications, Flutter for cross-platform mobile development, Node.js for backend services, and proficiency in SQL Server, PostgreSQL, and MongoDB databases. With a proven track record of developing efficient IT solutions and providing technical support, I excel in creating scalable and user-centric software applications.
